#### LIMITED EDITION PORSCHE

A limited edition of the popular Porsche 914 2.0-liter mid-engine roadster will be offered by Porsche dealers in April.

The Limited Edition is available in two colors: black and white. The black version is trimmed out with yellow rocker panels, front and rear bumpers, front spoiler, rear gravel deflector and wheels. The white version is accented in red.

The specially equipped model, of which only 1,000 will be produced, has a custom black interior, pressure cast alloy wheels, an aerodynamic front spoiler, front and rear stabilizer bars and color-keyed side stripes.

"While this unique color treatment and the addition of a front spoiler and stabilizer bars will set the car apart from other 914's, the Limited Edition has all the other features that has made the Porsche 914 the largest selling mid-engined sports car in history," according to John A. Cook, vice president of Porsche Audi Operations for Volkswagen of America, Inc.

"This new model is in keeping with the times," Cook said. "In spite of its reputation for performance, the Porsche 914 is a very economical car to operate. With its five-speed transmission and reliable four-cylinder air-cooled engine, the 914 is capable of delivering 30 miles per gallon during highway use.

(MORE)

"While most high performance cars are equated with poor gas mileage, all our models, even the Porsche Carrera, deliver over 20 miles per gallon and have a cruising range of 400 miles."
